

FLUENT — COMMUNICATION + PR **AGENT**

Your AI-powered communication strategist for press releases, media pitches, crisis statements & leadership messaging.

H1: FLUENT — The AI Communication & PR Agent Inside Influence OS

FLUENT is the communication engine of **Influence OS** — built to give founders, CXOs, PR teams, and agencies instant access to senior-level communication outputs that normally take days.

It replaces:

- slow agency turnaround
- inconsistent messaging
- generic press releases
- low-quality pitches
- scattered internal communication

With **strategic, context-aware, PR-ready outputs** generated in seconds.

FLUENT is not a writing bot.

It is an **intelligent communication agent** trained to think like a PR strategist, a communication lead, and a brand guardian.

H2: What FLUENT Does — Core Functions

Each capability is engineered for real-world PR & communication environments.

H3: 1. Press Releases (Any Format, Any Industry)

Generates:

- launch announcements
- funding news
- partnership releases
- expansion updates
- leadership appointments
- product announcements
- corporate impact stories

FLUENT adapts the tone for business media, startup media, lifestyle media, and sector-specific outlets.

H3: 2. Personalized Media Pitches & Journalist Outreach

Creates:

- targeted pitches
- personalized angles
- journalist-specific hooks
- short pitches, long pitches, multi-angle pitches
- value-driven outreach copy

PR teams get **agency-quality pitching** without delay.

H3: 3. Crisis & Reputation Communication

What is online reputation management?

Online reputation management involves actively monitoring and influencing how your business is perceived online. The main goal of this process is to control the online conversation surrounding your brand using various strategies to ensure that when people search for you online, they come across information that paints a favorable picture.

sproutsocial.com/insights

sproutsocial

6

FLUENT generates:

- holding statements
- leadership notes
- public clarifications
- investor-facing clarifications
- customer messages
- apology frameworks
- risk-minimizing language

Built for reputational sensitivity.

H3: 4. Executive & Internal Communication

FLUENT supports leadership teams with:

- internal announcements
- founder emails
- policy changes
- culture communication
- employee memos
- stakeholder updates
- leadership notes during change

This ensures communication clarity inside the company — not just outside.

H3: 5. Narrative-Based Brand Messaging

FLUENT creates messaging systems that support:

- PR narratives
- brand story development
- strategic communication pillars
- leadership narrative consistency
- tone + voice alignment
- platform-specific messaging

Communication becomes clearer, sharper, and more strategic.

H3: 6. Multi-Format Communication Assets

Generates:

- FAQs for press & stakeholders
- briefing documents
- talking points

- interview prep
- communication frameworks
- quotes & statements for media
- multi-language variations (if enabled)

H2: FLUENT Dashboard — What Users See

6

The FLUENT dashboard includes:

Panels

- Communication Builder
- PR Pitch Engine
- Crisis Mode
- Messaging Library
- Stakeholder Communication Panel
- Quote + Statement Generator
- Press Release Composer

Metrics

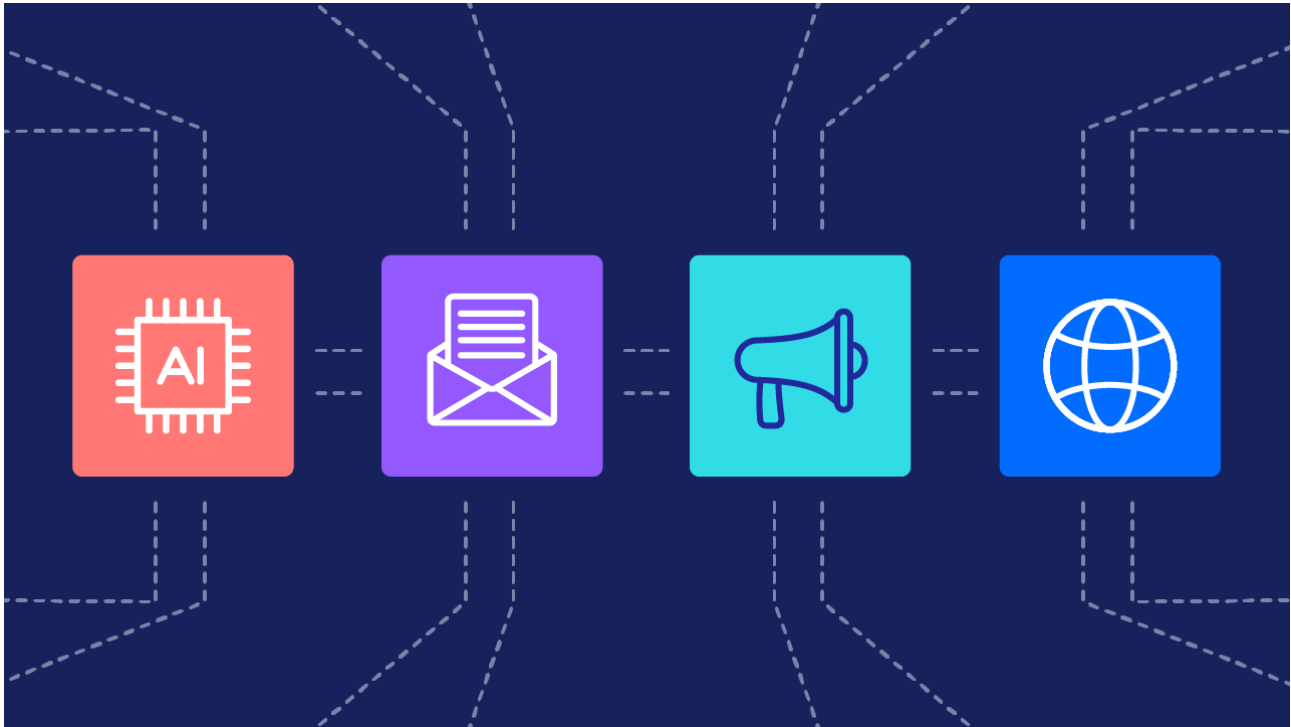

- PR Output Velocity
- Communication Consistency Score
- Tone Accuracy Index
- Response Time Improvement

Actions

- Generate press release
- Create pitch
- Activate crisis mode
- Build communication framework

- Produce stakeholder announcement

H2: How FLUENT Works — Step-by-Step

6

1. Input Your Objective

E.g., “Launch announcement,” “Crisis response,” “Pitch Forbes.”

2. Select Tone & Audience

Business media, startup media, lifestyle outlets, internal team, investors, customers, etc.

3. Add Context (Optional)

Founder's quote, product details, timeline, region, etc.

4. FLUENT Generates Strategic Communication

Press releases, crisis statements, pitches, or internal memos — instantly.

5. Refine, Save, Export, or Automate

Outputs can be:

- repurposed by IVY
- amplified by ECHO

- analyzed by LUMA
- aligned with narrative via NAVI

FLUENT is the **communication nucleus** of Influence OS.

H2: Use Cases — What FLUENT Replaces

6

1. PR team bottlenecks

Slow turnaround → instant outputs.

2. Founder communication gaps

Leadership messaging handled smoothly.

3. Media outreach inconsistency

Personalized pitching at scale.

4. Reputation vulnerabilities

Crisis mode provides protective communication instantly.

5. Content chaos

A structured messaging library reduces confusion.

6. Costly agency dependencies

FLUENT brings senior-level communication clarity in-house.

H2: Who FLUENT Is For

Founders

Who need PR-ready communication without waiting.

PR & Communication Teams

Who need speed, precision, and consistency.

Marketing Teams

Who need messaging clarity and amplification-ready content.

Agencies

Who want faster delivery and white-label communication outputs.

CXOs & Leaders

Who require controlled, polished communication.

H2: FLUENT Compared to Traditional PR Tools

Feature	Traditional Tools	FLUENT
Press Releases	Templates	Narrative-aware, PR-ready outputs
Media Pitches	Manual writing	Personalized, journalist-specific
Crisis Statements	Slow turnaround	Instant, risk-sensitive
Leadership Content	Manual	Executive-grade
Messaging Systems	Rare	Built-in
Integration	Low	Deeply integrated across OS
Insight	Limited	Powered by LUMA + ECHO

FLUENT is a **strategic intelligence engine**, not a template library.

H2: Why FLUENT Is Different

1. Built for India + UAE communication styles

Nuanced, context-aware language aligned to regional media behavior.

2. Multi-agent synergy

Works with NAVI, ECHO, LUMA, IVY, AURA.

3. Not a writing tool — a communication strategist

Outputs reflect strategic clarity and brand consistency.

4. Real-time crisis adaptation

Instant crisis messaging.

5. Executive-grade tone

Professional, accurate, and aligned with leadership expectations.
