

LUMA — INSIGHT, INTELLIGENCE & FORECASTING AGENT

Your AI-powered brand intelligence system for reputation monitoring, trend forecasting, competitive insights, and decision-grade analytics.

H1: LUMA — The AI Insight & Forecast Agent Inside Influence OS

LUMA is the intelligence and analytics backbone of **Influence OS**.

It gives founders, CXOs, PR teams, communication teams, and agencies **decision-ready insights** that were previously fragmented, delayed, or unavailable.

LUMA transforms:

- raw data → strategic intelligence
- scattered analytics → unified brand health
- market noise → trend prediction
- early signals → risk prevention
- performance gaps → clear action plans

This is **proactive brand intelligence**, not reactive reporting.

H2: What LUMA Does — Core Intelligence Capabilities

H3: 1. Brand Health Dashboard

LUMA generates a unified view of:

- visibility
- sentiment
- authority signals

- competitive presence
- media activity
- content performance
- executive influence score

You always know exactly where your brand stands.

H3: 2. Reputation Risk Detection (Early Warning System)

LUMA identifies:

- negative sentiment spikes
- misinformation patterns
- crisis signals
- competitor attacks
- sensitive conversations
- unusual activity

This enables early intervention **before reputational damage occurs**.

H3: 3. Trend Prediction & Opportunity Forecasting

LUMA detects:

- emerging category trends
- industry conversation movement
- media storyline evolution
- leadership opportunities
- platform-specific waves
- timing windows for visibility

You always know **what's coming** before it peaks.

H3: 4. Competitive Momentum Benchmarking

LUMA tracks competitors across:

- media presence
- sentiment
- narrative direction
- content velocity
- executive visibility
- category positioning shifts

This helps brands understand:

- who is gaining ground
- who is losing momentum
- which narratives are working
- which angles are oversaturated

H3: 5. Data → Narrative Insights

LUMA converts numbers into:

- PR angles
- leadership POV opportunities
- content topics
- trend-aligned narratives
- founder commentary cues
- amplification pathways

This bridges analytics and communication strategy.

H3: 6. Executive Decision Support

LUMA generates:

- weekly leadership briefs
- opportunity maps
- risk reports
- narrative recommendations
- visibility forecasts
- category intelligence summaries

This supports founder & CXO decision-making.

H3: 7. Perception Analysis Across Platforms

Tracks sentiment across:

- news
- business media
- social platforms
- industry communities
- investor circles
- professional networks

Clear insight into how different ecosystems perceive your brand.

H2: LUMA Dashboard — What Users See

Panels

- Brand Health Panel
- Opportunity Forecast Map
- Risk Detection Radar
- Competitor Momentum Grid

- Trend Graph
- Sentiment Analysis Panel
- Founder Authority Metrics

Metrics

- Reputation Risk Score
- Trend Prediction Index
- Narrative Performance Score
- Authority Growth Rate
- Market Momentum Ratio
- Category Presence Score

Actions

- Generate executive brief
- Predict next PR opportunity
- Run risk simulation
- Analyse competitive movement
- Identify emerging trends

H2: How LUMA Works — Step-by-Step

Step 1: Collect Inputs

Brand data, media data, social data, competitor data.

Step 2: Analyze Patterns

Sentiment → trends → risks → opportunities.

Step 3: Predict Movement

Forecast brand trajectories & category changes.

Step 4: Recommend Actions

Visibility, narrative, communication, and leadership steps.

Step 5: Integrate Across Agents

LUMA informs FLUENT, NAVI, ECHO, IVY, and AURA.

H2: Use Cases — What LUMA Replaces

1. Manual reports

Weekly/monthly reporting → real-time intelligence.

2. Expensive listening tools with no strategy

LUMA provides insights AND action steps.

3. Guess-based decision making

Leaders get data-driven clarity.

4. Slow trend reaction

LUMA anticipates trends early.

5. Fragmented data sources

Everything unified in one dashboard.

6. Blind spots in narrative health

LUMA identifies what narratives work, weaken, or saturate.

H2: Who LUMA Is For

Founders & CXOs

Who require decision-grade insights.

PR & Communication Teams

Who need early trends, risk detection, and narrative direction.

Brand & Marketing Teams

Who want competitive clarity and platform intelligence.

Agencies

Who need reporting, insight generation, and forecast accuracy.

Growth Teams

Who rely on data-backed visibility systems.

H2: Why LUMA Is Different

1. Proactive, not reactive

Predicts trends instead of reporting them.

2. Multi-agent synergy

Insights directly fuel PR, messaging, content, and distribution.

3. Designed for India + UAE context

Understands regional media sentiment patterns.

4. Actionable intelligence

Insights → action → outcome.

5. Executive-grade clarity

Short, sharp, strategic insight delivery.
